

**Feature: Rent a car**

**In order to place a booking**

**Customer needs to choose date, car type and provide the correct information**

**Scenario: Choose date**

Given the user is logged in

And on step one of the booking process

When customer specifies the date

Then the cars available for rental will be represented for the customer

**Scenario: If no cars available at chosen date**

Given the user specifies the date

And there is no available cars matching the chosen date

Then there will appear message: "Sorry, no match. Please chose another date"

**Scenario: Choose Car**

Given that the customer is logged in

And has chosen the date

When customer clicks on one of the available cars

Then there will appear a message asking the customer for verification of the chosen car and date including the total price of the booking

**Scenario: Cancel or restart booking**

Given that the customer is logged in

And has started the booking process

Then there will be a option for the customer to go back and make changes in the booking
